## The View on Windows 10

**InfoWorld**

***Everything you need to know about Windows 10***

Since its release, Windows 10 has triggered waves of adulation, scorn, and uncertainty.

Does InfoWorld's senior contributing editor [Woody Leonard](#) have a crystal ball? "Is it a worthy successor to Windows 7? Should you get it now, or wait? Will you be forced to update at Microsoft's pace? Why is the commercial version free? What happens when there's a bad patch? Are there any worthwhile new Windows 10 programs? The answers to those questions are not necessarily straightforward..." *Download the rest of this **Deep Dive** [here](#).*

***Microsoft announces new Windows Defender Advanced Threat Protection (but there's a catch)***

Microsoft is releasing a new system that promises to detect security attacks on enterprise networks as they happen. But it needs something in return.

"Microsoft has put a lot of time and effort into making Windows 10 in the enterprise as secure as it can possibly be. It's a cornerstone of the company's overall strategy: Get the whole world using Windows 10 and keep it updated and secure..." [Mark Kaelin](#) gives you the full scoop on Bit Defender in his March 8, 2016 post on TechRepublic [here](#).

## ***How existing Windows users can refuse Microsoft's Windows 10 update***

If you don't want Windows 10 to automatically update on your Windows 7 or 8 device, for whatever reasons, you have a choice. Here's how to say no.

"Over the past week, I've noticed a number of users complaining on Twitter, Reddit and other social channels about their PCs automatically updating to Windows 10, allegedly without their intervention.

At least some of the grumbling may be attributable to a patch Microsoft pushed to a number of users this week as part of Patch Tuesday..." [Continue reading the entire post from All About Microsoft contributor Mary Jo Foley from March 11, 2016.](#)

## ***Migration Manager Cuts PC Transition Time by 45%***

### ***Case Study: Metro PC Works***

"...The key difference with most of the other methods I've tried out there have to do with managing change. If you are going same to same, imaging and other persona management solutions

can be fine. But the minute you are changing domains, changing application versions, or changing document storage management policies, the real differences with other methods and Migration Manager start to become really clear..." - *Chris Moore, Director, Metro PC Works*.
